Summary

Hi, I am an engineer with passion for front-end development and strong self-learning ability. I hope to be involved in building a system or service that not only has a product influence but also prioritizes the product quality. Aspire to be part of a team with a startup atmosphere.

Experience

Engineer

04/2022 - Present

VIVERSE is dedicated to building the metaverse, and I am mainly responsible for creating services related to avatars.

- Implement UI/UX with responsive layout and user-friendly flow while working closely with designer and clarifying requirements from PM.
- Collaborate with backend team member to manage features and implement complex business logic related to avatars.
- Maintain and extend avatar creator service, integrating with 3D knowledge, while paying close attention to performance optimization.
- Optimize and enhance avatar models, collaborate closely with 3D artists, and ensure the quality of the models.
- Research and deliver experimental POC tasks.
- Technical sharing and document writing.

Education

National Tsing Hua University

09/2016 - 06/2020

Bachelor Quantitative Finance
