## Summary

Hi, I am an engineer with passion for front-end development. Focus on SaaS and aspire to be part of a team with a startup atmosphere.

## Experience

### Engineer

04/2022 - Present

- Iterate the editor for generating avatar models building with WebGL, collaborate closely with 3D artists, and ensure the quality and performance of the output models.
- Collaborate with backend team member to manage features and implement business logic related to avatar service.
- Deliver 2.5D features while working closely with UI/UX designer and clarifying requirements from PM.
- Research and deliver experimental POC tasks.

## Education

### National Tsing Hua University

Bachelor Quantitative Finance

09/2016 - 06/2020
